ARCHITECTURAL CONCRETE

STAMPING TEMPLATES

CONCRETE RUBBER STAMPS FOR ARCHITECTURAL CONCRETE

LM Scofield

LITHOTEX Pavecrafters Professional Grade Imprinting Tools are a system of matched tools used to transform the surface of freshly place architectural concrete flatwork into patterns that mimic other building materials. A remarkable collection of premium appearances is possible. Virtually any texture or pattern, whether designed by nature or imagined by man, can be accurately duplicated by the use of LITHOTEX Pavecrafters Professional Grade Imprinting Tools.

A VARIETY OF STAMP STYLES AND PATTERNS ARE AVAILABLE. PLEASE CALL FOR INFORMATION.

PATTERNS: FRACTURED SLATE, COBBLESTONE, CANYON STONE

FORM LINERS

4' X 8' TEXTURED FORM LINER

A variety of Form Liners are available. Not all textures are in stock, but are readily accessible.

GREENSTREAK

COLORANTS

CHROMIX ADMIXTURES, COLOR-CONDITIONED CONCRETE

LM Scofield

CHROMIX Admixtures for Color-Conditioned concrete provide permanent, fade-resistant, uniform, and streak-free integral color conditioning for all types of concrete projects, from floors and hardscapes to cast-in-place or precast walls. They are true water-reducing admixtures, premeasured, and packaged in disintegrating bags for easy and accurate addition into the concrete mix. 6 sack mix. One six-sack mix per every yard of concrete. Varieties of colors are available.

VARIETIES OF STANDARD AND SPECIAL COLORS ARE AVAILABLE. PLEASE CALL FOR INFORMATION.

SCOFIELD LITHOCHROME TINTURA STAIN

LM Scofield

A ready-to-use, penetrating, reactive staining product that chemically combines with cured concrete or cementitious toppings to produce translucent color effects. Tintura stain is a nonacidic, water-based, environmental friendly product. Creates vibrant looks with a wide color selection.

AVAILABLE BY SPECIAL ORDER. PLEASE CALL FOR DETAILS

CONCENTRATED MORTAR COLOR

Solomon

SGS mortar colors are formulated to produce pleasing color shades that complement or accentuate the wide range of colors found in brick, stone and colored concrete block. All mortar colors are shipped in proportioned packages, which have been accurately pre-weighed and measured. Each individual package is designated as one color unit.

A VARIETY OF COLORS ARE AVAILABLE IN STOCK OR CAN BE CUSTOM ORDERED. PLEASE CALL FOR INFORMATION.

2 LB. BAGS.

INTEGRAL COLORS FOR READY MIX

Solomon

Solomon Colors Integral Colors For Ready Mix Concrete are pure mineral pigments designed for use in cementitious slump applications. These colors are commonly used in the manufacturing of ready mix concrete, architectural concrete stamping, driveways, sidewalks, patios, grout, vertical precast, and poured-in-place concrete construction. The ready mix colors represent approximate shades obtained using gray portland cement and 25 lbs. of color per 4 yards, 2 yards and 1 yard of ready mix concrete.

VARIETIES OF STANDARD AND SPECIAL COLORS ARE AVAILABLE. PLEASE CALL FOR INFORMATION.

25 LB BAGS.

DESIGN CRETE, FRENCH GRAY HARDENER

Symons

COLOR HARDENER is a shake-on material that contains carefully balanced pigments that produce a colored concrete surface. The surface can then be patterned with concrete stamping tools simulating brick, block, slate, tile or other textures. COLOR HARDENER increases the density and durability of concrete floor surfaces. This improves wear resistance, reduces dusting and minimizes maintenance and repair, while enhancing the concrete surface appearance.

VARIETIES OF COLORS ARE AVAILABLE. PLEASE CALL FOR INFORMATION.

COLORANT HARDENER & RELEASE **ANTIQUÉ RELEASE, DEEP CHARCOAL**

LM Scofield

LITHOCHROME Antiquing Release is broadcast over the surface of freshly placed color-concrete hardscapes or interior floors before imprinting with LITHOTEX Pavecrafters or other mat-type texturing tools, embossing skins, or rollers. It forms a bond-breaking barrier that helps prevent the tools from sticking to the fresh concrete and marring its fragile surface.

ITEM # 716600 30 LB PAIL

LITHOCHROME COLOR HARDNER

LM Scofield

Formulated to be easily incorporated into the surface of freshly placed concrete, LITHOCHROME Color Hardener produces hard, durable, abrasion-resistant hardscapes or interior floors. LITHOCHROME Color Hardener is regularly used when imprinting or stenciling concrete to produce the look of brick, tile, or aged stone. LITHOCHROME Color hardener is a ready-to-use, dry-shake, colored or uncolored hardener for freshly placed concrete hardscapes or floors.

VARIETIES OF STANDARD AND SPECIAL ORDER COLORS ARE AVAILABLE. PLEASE CALL FOR MORE INFORMATION.
60 LB BAG

LITHOTEX LIQUID RELEASE FOR RUBBER CONCRETE STAMPS

LM Scofield

LITHOTEX Liquid Release is a high-performance, odorless, liquid bond breaker used when imprinting concrete and cementitious toppings with mat-type texturing tools, embossing skins, or texturing rollers to provide easy release of the tool.

COLORED RELEASE

Solomon

Solomon Colors Colored Release is used when stamping fresh concrete surfaces. The release is designed to create a lubricant and release membrane between the imprint tool and the concrete surface. Solomon Colors Colored Release will provide an antique effect to the surface of the imprinted concrete. Actual colors will vary depending on the amount used per square foot and the color of the concrete with which they are used.

**VARIETIES OF STANDARD COLORS AVAILABLE. PLEASE CALL FOR MORE INFORMATION.
5 GAL PAIL**

COLOR HARDENER

Artcrete

Faux Brick Color Hardener is a ready-to-use, dry shake material designed specifically for use with Faux Brick Stencils to create brick, tile, stone and other patterns in concrete. It is also well suited for coloring, hardening, and finishing new concrete floors, walkways, pool decks, and other flatwork.

Variety of Colors are available. Please call for more information.

COLOR RELEASE

Artcrete

Faux Brick® Release Agent, used in conjunction with Faux Brick® Texture Rollers helps keep the concrete from sticking to the roller and imparts a contrasting color to your Faux Brick projects.

5 GAL PAIL**

CONCRETE STAINS

CHEMSTAIN

LM Scofield

Formulated to add color to uncolored concrete or to change the color of colored concrete, LITHOCHROME Chemstain Classic chemically reacts with the surface of cured concrete to produce unique and permanent color effects. LITHOCHROME Chemstain is a ready-to-use, penetrating, reactive stain that chemically combines with cured concrete to produce permanent, variegated or translucent color effects.

VARIETY OF COLORS ARE AVAILABLE. PLEASE CALL FOR MORE INFORMATION.
