

1 1/2" x 4' x 8' INSUL DRAIN

Owens Corning

Designed for residential and commercial foundations
 Fabric covered channels drain water from vertical foundation walls
 High R-value improves foundation thermal performance
 Provides protection for waterproofing membrane
 Tongue and groove edges help seal joints.

ITEM # 726549

2" X 8'6" FURRING STRIP

ITEM # 726580

PANELS

ARCHITECTURAL PANELS

PANEL 15 4' x 8' STATUARY BRONZE

Citadel Architectural Products

Panel 15® is a composite panel made by laminating a textured aluminum skin to a substrate of douglas fir exterior grade plywood. A fiberglass reinforced kraft/foil scrim backer is added for panel balance and acts as a moisture barrier. These panels are ideal for applications such as; claddings, canopies, fascia, accent bands, and soffits.

Panel 15® is also ideal for many other applications where durability, strength, and overall cost are primary concerns.

MOLDING ACCESSORIES FOR THE PANEL 15 SYSTEM

Citadel Architectural Products

Moldings for Panel 15 System

For a non-progressive installation, the two-piece extruded moldings may be used. Plastic receivers are first installed, then construction adhesive is placed in the field of the panel. The panels are then fastened around the perimeter and sealant is applied. The joints are completed with a snap-on aluminum cover. For a progressive installation, the one-piece moldings are used. The extrusions are mechanically fastened to the substrate and the panels are then inserted and installed using sealant around the perimeter and construction adhesive in the field of the panel

Available by special order for your custom project!

Nichiha fiber cement products are visually unmatched in texture, beauty and quality and offer design flexibility for commercial and residential properties. The Nichiha patented clip installation system for brick and stone creates a pocket of air between the panels and the substrate. This reduces moisture build up and enhances the integrity of the substrate.

Nichiha fiber cement products resist rot, fungus and termite infestation. Extreme weather conditions will not cause Nichiha products to crack or delaminate. Nichiha fiber cement panels are as easy to cut and handle as other fiber cement siding products. It installs easily and quickly, with no special tools required. Blending beautifully with a broad spectrum of traditional siding products and siding trim accessories, Nichiha fiber cement products offer a wide array of design solutions for every building style.

VINTAGE BRICK & NEWPORT BRICK

Product Specifications

Dubuque, IA (800) 894-6272 • Grand Island, NE (800) 228-8572

Description:

Classic rich brick texture for single and multi-family homes as well as commercial developments.

Design flexibility for building exteriors and signature interior spaces.

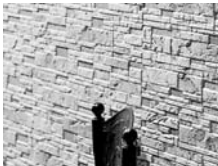

Attractive curb appeal with two brick styles and six color options.

The patented clip installation system creates a pocket of air between the panels and the substrate. This reduces moisture build up and enhances the integrity of the substrate.

Brick panels are completely compatible with vinyl and metal trim accessories.

Panels are ship-lapped on four sides for tight fit and seamless appearance.

Multi-layered coating process creates a lasting finish.

**BRESTONE & LEDGESTONE**

Deep shadow lines and the timeless appearance of drystack stone create striking accents for both interiors and exteriors.

Design flexibility for single and multi-family homes, as well as commercial developments, with two stone styles and six color options.

The patented clip installation system creates a pocket of air between the panels and the substrate. This reduces moisture build up and enhances the integrity of the substrate.
