

TREMDRAIN 1000

Tremco

TREMDrain 1000 is a two-part pre-fabricated drainage material and protection board consisting of a formed polyurethane core covered on one side with a non-woven needle-punched polypropylene filter fabric. The fabric allows water to pass into the drainage core while restricting the movement of soil particles. The plastic core provides compressive strength and allows high capacity flow to the TREMDrain Total-Drain. TREMDrain 1000 is designed for vertical and selected horizontal installations requiring high compressive strength and where high flow capacity is necessary.

SYNKO-FLEX WATERSTOP

Henry

Synko-Flex, a non-swelling, preformed adhesive waterstop is a proven, economical alternative to conventional PVC waterstops. Used on cold joints at footings, walls or slab joints, Synko-Flex is simple to install and requires no split forming, welding of splices or wiring to rebar. Its ease of installation means substantial savings on labor costs.

DUMB-BELL WITH CENTERBULB WATERSTOP

Greenstreak

The centerbulb accommodates transverse, lateral and shear movements. Large centerbulbs accommodate greater movements mechanically without significantly stressing the material. Ribbed styles have superior sealing capabilities over dumbbell styles and can be considered for similar applications.

RIBBED CENTERBULB WATERSTOP

Greenstreak

The most versatile design available. The centerbulb accommodates transverse, lateral and shear movements. Larger centerbulbs will accommodate greater movements mechanically without significantly stressing the material. Ribbed styles have superior sealing capabilities over dumbbell style waterstops.

SPLIT RIBBED CENTERBULB WATERSTOP

Greenstreak

Eliminates split formwork in long straight runs. Do not use where design of the forms or locations of reinforcing prohibit opening of the split flange. Quality splicing is extremely difficult at intersections and changes in direction.

DUMB-BELL WATERSTOP

Greenstreak

Use Dumbbell profiles where little or no transverse movement is expected. Flat Ribbed Profiles are also for similar applications.

FLAT RIBBED WATERSTOP

Greenstreak

Use Flat Ribbed profiles where little or no transverse movement is expected. Ribbed designs provide superior sealing capabilities over Dumbbell style waterstops.

WATERSTOP RX101

Cetco

WATERSTOP-RX® is a sodium bentonite based waterstop designed to stop water infiltration through cast-in-place concrete construction joints by expanding upon contact with water to form a positive seal against the concrete. The key to WATERSTOP-RX's effectiveness is its 75% sodium bentonite content which provides superior expansion to seal and fill voids and cracks in the concrete.

VAPOR AND AIR BARRIERS

MOISTOP 395 VAPOR BARRIER

Fortifiber

Moistop® sets the industry standard for Underslab Vapor Retarders. With a water vapor permeance of less than .30 perms, it exceeds ASTM E-1745 requirements for water vapor permeance, providing an extremely effective barrier to moisture vapor transmission through concrete slabs.
